Senior Software Engineer

Software Engineer with 8+ years of experience architecting enterprise-grade data platforms and a proven track record of driving large-scale infrastructure and platform transformations through organizational turbulence to deliver outsized business impact.

Experience

Snyk — *Boston, MA*

Staff Software Engineer Container Security Product Team — May, 2025 – Jul, 2026

- Architected and led the UI/UX transformation for Snyk's container security product, introducing native primitives to optimize user workflows from discovery to remediation.
- Designed and evangelized standardized patterns aligned across multiple replatforming initiatives, from frontend down to data-layer, enabling scalable implementation for Snyk's remaining product lines.
- Steered a team of 4 engineers through high tech debt and organizational restructuring, delivering a high-priority product milestone on schedule.

Wayfair — *Boston, MA*

Staff Software Engineer Data and Machine Learning Platforms — Apr, 2018 – May, 2025

- Automated HDFS file compaction, reducing small file counts by 98% to optimize block sizes and significantly extend cluster life expectancy.
- Designed a configuration-based ETL framework to generate standardized, foundational data assets for ML and analytics platforms while eliminating data sprawl.
- Led high-impact data platform migrations (on-prem -> hybrid -> enitrely on GCP), enabling multi-datacenter processing with lower latency and higher stability.
- Drove infrastructure cost-saving initiatives that slashed annualized spending by $10MM+ through optimized Cloud Storage policies and tuned Dataproc usage.
- Led an agile team of 4 engineers transforming Wayfair's data platform into a data mesh focused on improving data quality & agility at scale.

Technical Skills

Cloud Platforms:	Google Cloud Platform
Data Storage:	Avro, Parquet, PostgreSQL, Aerospike, Google BigQuery, Google Cloud Storage, Kafka
Developer Tooling:	Git, Maven, Buildkite, InfluxDB, Datadog, Grafana, Kibana, K8s, Terraform
Libraries & Frameworks:	Sprint Boot, React, Spark, Flink, Airflow
Programming Languages:	Python, Java, Bash, JavaScript, TypeScript, Go

Education

Middlebury College — *Middlebury, VT*

Major: Bachelor of Arts in Computer Science, *summa cum laude* — Feb, 2012 – Feb, 2016
Minor: Mathematics
GPA: *Major:* 3.93/4.0 *Overall:* 3.91/4.0
Honors: Phi Beta Kappa, College Scholar 6 Semesters
